Microsoft Certification ID: 993147521

Congratulations! You have earned your **Office2019: Microsoft Office Specialist: Excel Associate** certification.

We'll notify you if and when it's time to renew your certifications

- Did you know that Microsoft role-based and specialty certifications expire every year unless renewed?
- If you need to renew your certification, we'll send you an email when it's eligible—six months before its expiration date.
- To renew, simply pass the no-cost assessment on Microsoft Learn before your certification expires. For more information, go to [Renew your Microsoft Certification](#).

Access your Microsoft Certification Dashboard

To download your transcript, score report, badges, and certifications, including this most recent one, sign in to your [Microsoft Certification Dashboard](#) using your Microsoft account (the same one you used to register for your exam). You can also view any upcoming exam appointments, along with certifications eligible for renewal.

Thank you,

The Microsoft Certification team
